As of March 25, 2020, 2,295 cases of COVID-19 and 43 associated deaths have been confirmed for the State of Michigan. There are critical shortages of hospital and ICU capacity, medical equipment, personal protective equipment, and other resources and supplies. Case numbers are growing rapidly which will further overwhelm the state’s public health system and exceed the ability of state and local governments to respond to this crisis.

The State Emergency Operations Center and Community Health Emergency Coordination Center have been activated, are marshaling resources, and direct the state response to this crisis. Local governments have staffed Emergency Operations Centers, activated response aspects of Emergency Operations Plans and health procedures, and are coordinating response activities locally. 24 Executive Orders have been issued to ensure the health and safety of the public and make necessary resources and supplies available to the maximum extent possible.

Completion of this form including applicable attachments satisfies legal requirements for emergency and major disaster declaration requests under 42 U.S.C. §§ 5170 and 5191, respectively, as implemented at 44 C.F.R.. §§ 206.35 and 206.36. Failure to use this form may result in a failure to meet these requirements and/or a delay in processing the request.
