Subject: Suggestion

Given that we are having more and more compensation seeking veterans, I'd like to suggest that you refrain from giving a diagnosis of PTSD straight out. Consider a diagnosis of Adjustment Disorder, R/O PTSD.

Additionally, we really don't or have time to do the extensive testing that should be done to determine PTSD.

Also, there have been some incidence where the veteran has a C & P, is not given a diagnosis of PTSD, then the veteran comes here and we give the diagnosis, and the veteran appeals his case based on our assessment.

This is just a suggestion for the reasons listed above.
